User Integration

Users

- allows a user to create a new account

- authenticates a user's request to login

- keeps track of user from page to page

- authorize a user's access to various app resources

Build a User Model

o A web app must store user accounts in the database

o Thus, a user schema and user model is required

o Each user document includes following information
  ◦ firstName
  ◦ lastName
  ◦ email
  ◦ password

Demo: User Model
